OBJECTIVE

A motivated and detail-oriented Information Systems graduate with solid knowledge and hands-on experience in data analysis. I have completed several professional courses in data analytics, including data visualization, statistical analysis, and business intelligence. Skilled in tools such as Excel, SQL, Python, and Power BI, I aim to contribute to data-driven decision-making and provide meaningful insights that support organizational growth. Eager to join a forward-thinking team where I can continue to develop my analytical skills and add real value through data.

EXPERIENCE

Jan 2024 – May 2025

Data Analyst – Software Company, Cairo, Egypt

- Analyzed and visualized data using Power BI to support business decisions with clear, actionable insights.
- Developed data processing tools and dashboards using Python (Pandas, NumPy, and Flask) to automate and streamline reporting workflows.
- Used AI tools to improve efficiency in data analysis and automate repetitive analytical tasks.
- Managed and queried relational databases including MySQL, PostgreSQL, and SQLite to extract, clean, and analyze data.
- Deployed and maintained data-driven web applications on Linux Ubuntu servers.
- Utilized GitHub for version control and collaborative development.
- Performed local development and testing using XAMPP environments.
- Created scheduled data backups and maintained data reliability and integrity.
- Contributed to the design of data-related marketing visuals and social media analytics reports.
- Worked closely with cross-functional teams to deliver data solutions aligned with business goals.

- Developed internal dashboards and tools using Python and Flask to streamline and optimize client operations through data insights.
- Gained hands-on experience in handling databases, integrating APIs, and deploying data-driven applications.
- Assisted in improving user experience and interface designs by leveraging data analysis and AI tools.
- Participated in end-to-end data workflows, from data collection and cleaning to analysis and visualization.

May 2025 – Present

Freelance Web Developer & Data Analyst

- Built and deployed multiple freelance projects using Flask, JavaScript, and modern web standards.
- Customized solutions for clients including database-driven applications, admin dashboards, and automation tools.
- Delivered actionable insights through Power BI data analysis for businesses.
- Provided hosting, deployment, and version control services for clients.

CERTIFICATES AND TRAININGS

Jan 2023

Data-Focused Project and Training Experience – University Competition

- Participated in a university competition by developing a complete web-based Flight and Hotel Booking system, integrating data handling and basic analytics features.
- Gained practical experience in data flow, structuring, and analysis within web applications during training.
- Worked on both front-end and back-end components, reinforcing an understanding of how data is collected, processed, and presented to users.

Mar 2023

Python & Data-Driven Application Training – Flask Framework

- Learned Python programming with a focus on back-end development and data processing using the Flask framework.
- Developed a financial management and inventory tracking system ("Financer"), involving data collection, storage, and analysis to support financial decision-making.

Jun 2024

Data Analysis Training

- Learned data analysis using Python, SQL, Excel, and Power BI.
- Completed a full data analysis project for an e-commerce company similar to Amazon. including data cleaning, visualization, and reporting.

PROJECTS

Graduation Project – Local Services Platform

- Handled the back-end development using Flask with a focus on structuring and managing service data.
- Collaborated with teammates in planning, assigning roles, and integrating data-driven features for a local services web platform.

Freelance & Personal Projects

- Developed a World Cup prediction game for a client (starcatcher.online), incorporating real-time data tracking and user interaction analytics.
- Built and maintained the website for an Egyptian clothing brand (athrfashion.com), including backend data management and customer behavior insights.
- Created a Tourism Company Management System (management-es.online) with features for booking data tracking and reporting.
- Developed multiple additional projects hosted on GitHub, such as:
 - An e-commerce website with product analytics and inventory data handling.
 - An e-learning platform that tracks user progress and performance metrics.

SKILLS

- Led a data-focused team project for a construction company in the UAE, where I analyzed website and social media performance metrics to improve online visibility and digital engagement.
- Utilized analytics tools to monitor user behavior, track KPIs, and generate actionable reports that informed business decisions.
- Applied data-driven planning to align team efforts with client objectives, ensuring high-impact outcomes.
- Excelled in team collaboration and communication to deliver results based on insights from structured data analysis.
