OBJECTIVE

An ambitious and detail-oriented Information Systems graduate seeking an entry-level position in the field of software development within a forward-thinking organization. I aim to apply my knowledge in systems analysis and software design, along with my programming and problem-solving skills, to contribute to the development of effective technological solutions. I am eager to gain more experience and expand my skills by working with a professional team focused on innovation and quality.

EXPERIENCE

Jan 2024 – May 2025

Python Web Developer – Software Company, Cairo, Egypt

- Developed and maintained web applications using Python Flask framework, with frontend technologies including HTML, CSS, and JavaScript.
- use AI tools to enhance development efficiency and automate repetitive tasks.
- Deployed and managed applications on Linux Ubuntu servers.
- Version control and collaboration using GitHub.
- Worked with MySQL, PostgreSQL, and SQLite databases.
- Performed XAMPP-based local development and testing.
- Created and scheduled data backups and ensured system reliability.
- Built interactive dashboards and reports using Power BI for data analysis and insights.
- Assisted in creating social media designs and marketing materials.
